Quora Genera Comments   July 10, 2018

I request a new report category be added for Illegal or Malicious Activity.

I've noticed an increasing in questions clearly seeking knowledge for illegal purposes. Recent examples:

- How do you hack an iPhone?
- How can I hack a Google account?
- How can a hacker hack bank websites?
- How do I hack a wi-fi password?
- How do I pay for email hacking?
- How can I hack a Facebook account?
- How are Twitter accounts hacked?
- Is there a way to steal Bitcoins?

I don't expect Quora to review every question. But for self-policing to work, end users need the right tools.

Quora's conduct policy bans illegal activity or malicious activity, but a question can only be reported for harassment, spam, insincere, poorly written, or an incorrect topic. There is no "Other" option.

Adding an Illegal or Malicious Activity category would align the form with Quora's conduct policy and give users the tool we need to report abuses.

Quora's a wonderful service. Please take steps to protect it from abuse.

Sincerely,

Michael McCormick
